Subject: Manasquan versus Camden

At the end of regulation my partner counted a field from Manasquan, we then got together spoke about it I told him what I saw from view. I saw the ball in his hands when the buzzer went off, my partner went with my observation and told the coach that the basket did not count. I spoke to Jack Baum directly after the game I explained to him the same thing from above, I then reviewed the play several times and the basket “should’ve counted” I had a second conversation with Jack about this as well.
